Product manager with 5+ years on consumer products at Flipkart, Tata 1mg, Meesho and ShareChat, platforms with 400M+ users, and end-to-end product ownership since 2022. MS in Product Management, Carnegie Mellon (Tepper), December 2026. Available January 2027.

EXPERIENCE

Cent Capital | AI Product Manager Intern — Jun 2026 to Aug 2026

- Sole product owner of VaultLedger, a local-first document Q&A product. Owned retrieval and evaluation end to end: hybrid retrieval plus a cross-encoder reranker raised **MRR from 0.50 to 0.79** against an 80-question golden set.
- Wrote the acceptance rules before the data existed, then cut my own leading improvement when it passed five of six gates: of the four answers it changed, three had become wrong.

Flipkart (Walmart) | Product Manager — Dec 2024 to Jan 2026 · Bangalore

*Owned the loyalty portfolio, its product strategy and its **$50M FY26 operating plan**. About 20M members: the top 10% of roughly 200M annual transacting customers.*

- Relaunched the premium paid membership. It launched as "VIP" and wasn't landing, so I repositioned it as **Flipkart Black** and rebuilt segmentation, eligibility, incentives and the signup funnel. **200K subscribers in month one; 170% YoY growth in member GMV.**
- Launched YouTube Premium and Netflix as Black benefits, owning the earn mechanic and the partner data that closed both deals. **About 350K activations in 3 months.**
- Owned **Treats**, the rewards feature for those members. Reframed rewards from a discount lever into an engagement mechanic. **+14% adoption, +8% frequency, +3% retention.**

Froker | Co-founder — Jun 2024 to Dec 2024 · Bangalore

- Co-founded a food discovery and ordering app for local restaurants: double-tap a food reel and every nearby restaurant serving that dish shows up to order from. Grew it to **about 20K users** in six months, then wound it down against a funding and engagement bar set in advance.

Tata 1mg | Product Manager (Analytics) — Jun 2023 to Jun 2024 · Gurugram

D2C healthcare marketplace with 50M+ visitors. Opened and owned the at-home diagnostics vertical, 0 to 1.

- Built a three-sided local marketplace: the customer orders a blood test, a phlebotomist collects at their door, a partner lab fulfills it. Ran city-by-city launches. **About 2,000 to about 50,000 orders a day across 50+ cities.**
- Owned the test-bundling recommendation engine (**+7% conversion**) and automated prescription verification over WhatsApp, resolving **80% of upload issues without a support call**. **US$145K saved a year.**

Meesho | Associate Product Manager — Jun 2022 to Jun 2023 · Bangalore

Merchant side of a 1M+ seller marketplace: onboarding, activation, catalog quality and incentives for first-time Tier-2 and Tier-3 merchants.

- Redesigned new-merchant activation with tiered ad credits, a rebuilt entry banner and a simpler first-listing flow. **Activation (five orders delivered in 45 days) went from 17% to 28%.**
- Found the incentive mechanism was the bottleneck, not the offer. Built an SQL job that dispenses credits to newly qualified merchants within about 2 hours. **Delivery time cut from 4 to 5 days down to about 6 hours.**
- Raised catalog quality for merchants who had never listed online: an image-match step that pre-fills predicted attributes, and **Listing Optimizer**, which flags the top missing attributes per product.

ShareChat | Analyst, Finance and Ads — Jun 2020 to Jun 2022 · Bangalore

- Sole analyst for a 15 to 20 person finance team on a 150M+ MAU platform. Built and presented the weekly and monthly business reviews to the CFO and Chief Commercial Officer, and owned the data behind three funding rounds.
- Ran the ad placement and ad-selection experiment program on constrained inventory. **+23% fill rate, +12% month-over-month ad revenue.**

DosaWallah | Co-owner — Dec 2020 to Aug 2021 · Bangalore

- Self-funded and ran a restaurant alongside a full-time job: menu, pricing, staffing and daily operations.

EDUCATION

Carnegie Mellon University, Tepper School of Business | MS in Product Management — Jan 2026 to Dec 2026 (expected) · GPA 3.78/4.0
