ABHINAV GUPTA

412-657-1548 | agupta7@tepper.cmu.edu | linkedin.com/in/abhinavgupta0809 | abhinavgupta0809.github.io

AI product manager with a proven track record in consumer growth and marketplaces across e-commerce, health tech, and fintech, delivering features used by millions. Builds for people doing something for the first time, from new sellers to first-time internet users, at the intersection of data fluency and user empathy. Ships LLM products hands-on and aligns stakeholders and cross-functional teams around them. CMU MS Product Management, Dec 2026.

PROFESSIONAL EXPERIENCE

AI Product Manager Intern, Cent Capital | AI fintech | Case study — Jun 2026 to Aug 2026

- Proposed and built VaultLedger 0 to 1, an on-device LLM assistant; aligned the co-founder on a low-regulatory-risk scope.
- Defined success metrics and release gates for model and prompt changes with a golden set; held back those that missed.
- Boosted retrieval ranking 58% with hybrid search and reranking on a synthetic 80-question golden set.

Product Manager, Flipkart | Walmart-owned e-commerce, 400M+ users | Case study — Dec 2024 to Jan 2026

- Reached 500K paid members in 4 months by launching Flipkart Black; owned user research, positioning, and roadmap.
- Enabled 350K YouTube Premium activations in 3 months by presenting to Google and modeling partner economics.
- Aligned stakeholders on a $50M loyalty budget with a take-up and cost simulator; built a 100-metric CEO dashboard.
- Lifted purchase frequency 8% and retention 3% across 20M users by owning Treats rewards in the Gold and Silver launch.
- Designed Black's upsell targeting and YouTube activation page, flow, and tracking with engineering and Google's data team.

Co-Founder, Froker | food-discovery startup — Jun 2024 to Dec 2024

- Grew a food-video discovery app 0 to 1 to 20K users by linking dishes on screen to nearby restaurants.

Product Manager (Analytics), Tata 1mg | Tata Group health-tech | Case study — Jun 2023 to Jun 2024

- Expanded daily at-home diagnostics orders 25x by improving recommendations, checkout flow, and operations.
- Saved $145K a year in call-center costs by designing a WhatsApp prescription flow; 80% of cases needed no agent.
- Increased medicine-page conversion 3% by running user research and shipping GPT and Synthesia videos in 15+ languages.
- Generated 12% more coupon redemptions by A/B testing a coupon page that ranked offers by cart savings.

Associate Product Manager, Meesho | marketplace onboarding 600K sellers a year | Case study — Jun 2022 to Jun 2023

- Raised activation for newly onboarded sellers 65% at flat cost by launching a new 3-step credit ladder incentive program; owned the PRD, solutioning, design, launch, and A/B testing.
- Improved feature discovery by lifting banner click-through 150% through A/B tests and user research with 15 to 20 sellers.
- Accelerated ad-credit delivery 16x and cut repeat abuse 73% by aligning Finance and Trust and Safety.
- Reduced seller drop-off during product listing by 7 points by running the user study and shipping image-recognition prefill.
- Shipped GPT-written seller product descriptions as product owner in 2023, generated from image labels and attributes.

Analyst, Finance, ShareChat | social media platform, 150M+ monthly users — Jun 2020 to Jun 2022

- Cut 4 hours from weekly review prep by automating reporting; managed CFO and CCO stakeholders for 18 months.
- Delivered 200+ metric investor data packs in 3 to 7 days across three funding rounds for ShareChat and Moj.
- Identified phone-maker partners for pre-install deals by mapping user and creator city tiers against top device brands.
